GENERATE RECIPES

FOOTER

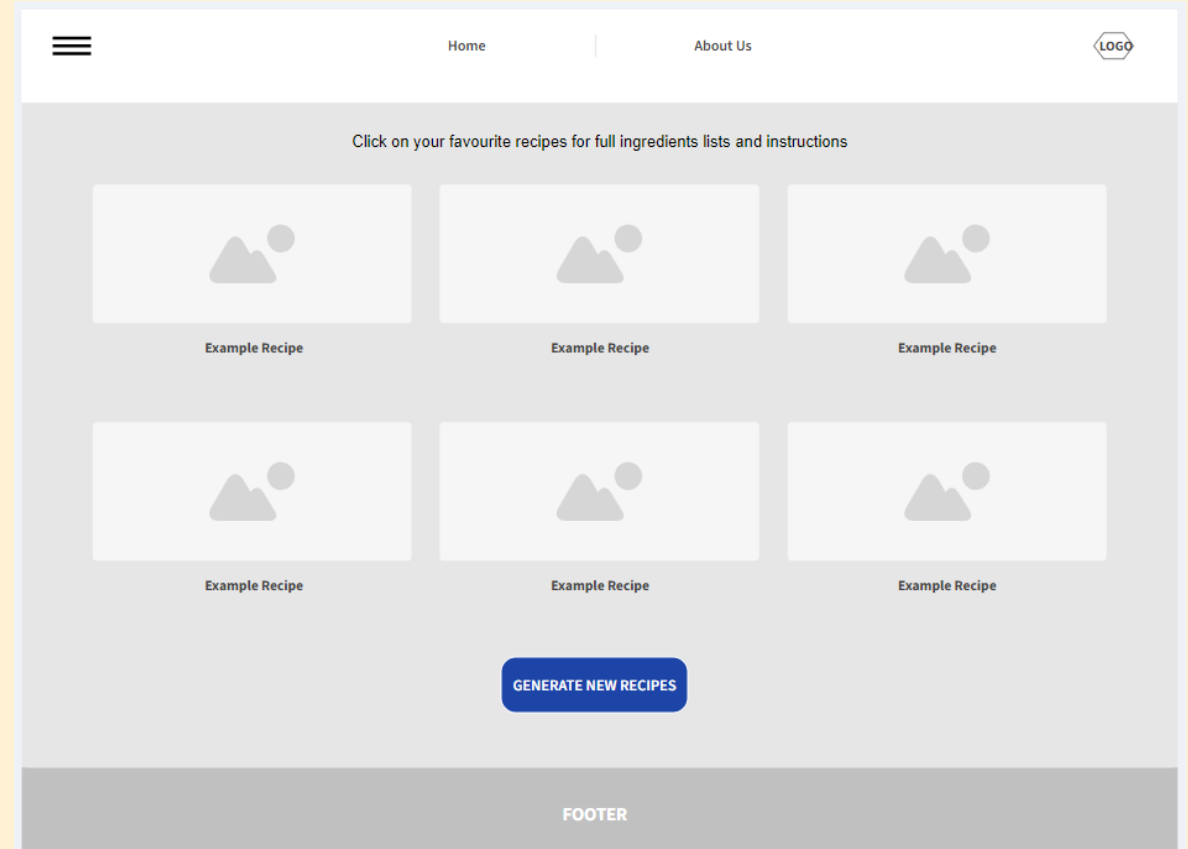

Recipe results

- 10 recipes will be returned for the user to choose from.
- Each recipe will be styled as a recipe card component

My account

- Users will be able to save their favourite recipes to their account
- We'll include functionality to count number of plants eaten that week

About us

- As this is a portfolio project, we'll include an about us section to showcase the software engineer team that built the site.
- We'll use React components and props to style these cards.
